RESPONSE TO ELECTION/RESTRICTION REQUIREMENT

Commissioner for Patents
Washington, D.C. 20231

Dear Sir:

This paper is in response to the Election/Restriction Requirement mailed on December 18, 2002. The Election/Restriction Requirement required an election of species between the species shown in FIG. 1 (Species A), the species shown in FIG. 2 (Species B), the species shown in FIG. 3 (Species C), the species shown in FIG. 4 (Species D) and the species shown in FIG. 5 (Species E). Applicants elect with traverse Species A that corresponds to claims 1-33, where claims 19, 20

and 22-24 are generic to each species. Note that there is support for all the claims covering Species A since the specification and FIG. 1 indicate that the condenser can be any of the embodiments shown in FIGS. 2-4 and identified by numerals 16, 16', 16'' and 16''' (See pages 10-12 of Applicants' Specification). Applicants traverse the election of species in that there would be significant overlap for the search for the inventions of each species and so there would be no hardship for both species to be searched and examined simultaneously. Indeed, Species A includes the embodiments of Species B-D and so the search of Species A necessarily requires a search of Species B-D. Accordingly, the election of species should be withdrawn and each species should be searched and examined.

Respectfully submitted,

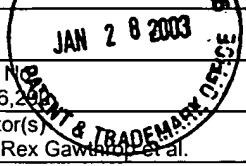

John C. Freeman
